Grower and Raiser of the New Remontant Hardy Border Carnations

It is an honor and a privilege to have the good fortune to introduce this remarkable carnation to my customers.

Prolific and continuous in bloom, with long rigid stems, bearing flowers beyond comparison. Enormous in size, gorgeous in their colors and gloriously fragrant.

The demand for the Remontant (Webster's definition meaning continuous in flower) Carnation has been sensational, both with the exhibitor and for garden decoration.

Their outstanding quality in the individual blooms, coupled with their prolific freedom of flowering and perfect habit of growth will undoubtedly make them prime favorites with all carnation lovers.

The plants we ship are not small cuttings, but large layered plants propagated from the parent plants out in the field. The plants are, therefore, large and stocky; being guaranteed to bloom profusely the first season.

PLANTING and DELIVERY

We recommend autumn planting on the Pacific Coast and similar climates, beginning in October. In colder climates and on heavy soils spring planting is safer. Plants then obtained from us will give excellent results even up to the middle of May.

GUARANTEE—We guarantee that all plants are true to name and type, rigidly inspected and to be in the finest condition. We cannot, however entertain any complaints after 10 days, or be responsible for failures, as such are beyond our control

The following large layered plants are available this season.

SOLD OUT
ALABASTER: Lovely outstanding white, enormous flower, prolific in bloom.

AUTOCRAT: Wonderful purple variety, flaked and splashed garnet red.
